

## How to change Record Stop Height on 70 Series Combine

1. Press 3rd button (Combine Setup) until display says 3/5.

2. Use feederhouse height/tilt button to position header at least 1 foot above harvesting height.

3. When header is at desired height use the black thumb dial to highlight the green arrow. Once the green arrow is highlighted press the checkmark button to set record stop height. Percentage will change to current feederhouse height.

4. Press Home Button and Harvest.
